Postman

Proactive B.Tech (IT) student at ABES Engineering College with a strong foundation in Java, Data Structures, and modern web technologies. Independently built and deployed **NilexCart** — a production-grade full-stack MERN marketplace — integrating real-time chat, cloud media, JWT authentication, and Razorpay payments. Passionate about building scalable, user-focused software solutions across web and mobile platforms.

PROJECTS

NilexCart – Full Stack Marketplace Platform

2025 – 2026

Personal Project · Deployed on Render

React 18

Node.js

Express.js

MongoDB

Redux Toolkit

Socket.io

Razorpay

Cloudinary

JWT

Nodemailer

Helmet.js

Render

- Architected a full-stack OLX-style marketplace using the MERN stack, allowing users to post, browse, filter, and purchase second-hand products with multi-image uploads.
- Implemented JWT authentication with bcryptjs hashing and role-based access control (Admin/User) with protected routes across frontend and backend.
- Integrated **Razorpay** payment gateway for UPI, card, and netbanking payments with server-side order creation and signature verification.
- Built real-time buyer-seller **Socket.io** , enabling instant chat between messaging using users without page refresh.
- Configured **Cloudinary** + Multer for cloud-based product image uploads, eliminating server storage dependency entirely.
- Used **Nodemailer** for OTP-based email verification and automated order notifications.
- Secured **Helmet.js** and **express-rate-limit** to protect against HTTP attacks APIs with and brute-force abuse.
- Developed companion mobile **React Native** and **Flutter** consuming the same REST APIs with real-time socket

B.Tech – Information

Technology

ABES Engineering College,
Ghaziabad

Expected Graduation: 2027

Intermediate (12th)

St. Xavier's Inter College,
Jaunpur

Graduated: 2022

KEY HIGHLIGHTS

- Deployed MERN app to production on Render with MongoDB Atlas
- Integrated end-to-end Razorpay payment gateway
- Built real-time buyer-seller chat with Socket.io
- Developed companion apps in React Native & Flutter
- Strong foundations in DSA, OOP with Java & C++

English

Hindi

applications in support.

- Managed global frontend state with **Redux Toolkit** and built a responsive UI using React-Bootstrap, react-slick, and react-toastify.
- Deployed **Render** , configured CORS, environment variables, and connected **MongoDB Atlas** cluster. to production

NilexShirt – E-Commerce Website

2024

Personal Project · Deployed on Netlify

 nilexshirt.netlify.app

HTML5

CSS3

JavaScript

Bootstrap

Netlify

- Developed a responsive e-commerce platform for clothing with product listing, category filtering, and a dynamic shopping cart.
- Implemented a functional shopping cart, secure checkout flow, and user authentication using vanilla JavaScript.
- Deployed the application on Netlify with continuous deployment, achieving fast global load times via CDN.
